

# DANGEROUS GOODS AWARENESS

---

# TRIDENT SAFETY GROUP AND **YOU**

---

**Trident Safety** *is a market leader in providing Dangerous Goods training and consulting services. Our mission is to provide expert solutions to meet all your regulatory requirements.*

**T**rident Industrial Safety Limited is a wholly owned Irish company established in 1990 and we have been delivering Dangerous Goods training courses for the last 18 years across all three major transport modes. Trident Safety has been involved with serving shippers, carriers and receivers of Dangerous Goods for over 25 years.

Over that time, Trident supported its clients with deep knowledge support in the form of Approved Training and Consultancy Services.

We believe that Effective Dangerous Goods (DG) management requires thorough knowledge of complex regulatory environments and solid experience in this detailed field of expertise.

Trident continues to be the preferred company to many national and international clients, a record of which we are extremely proud.

# DANGEROUS GOODS AWARENESS

*“Dangerous goods are substances and articles which are capable of posing a risk to health, safety, property or the environment”.*

Many everyday articles and substances can be dangerous when transported. Employees who may come into contact with Dangerous Goods need to be aware of the nature of the risks of such goods, their potential for causing incident and how they should be dealt with properly.

This on-site course is an introduction to the carriage of Dangerous Goods. It is intended for those who require a basic understanding of the subject.

Successful delegates could then meaningfully participate in our other Dangerous Goods Courses.

**This course is particularly relevant for future training in one of our accredited courses in Air, Road and Sea.**

Due to the variations in temperature and pressure during shipment, some items may leak or break.

Therefore choosing correct packaging is particularly important.
